

END CONES FOR EXHAUST EMISSION CONTROL DEVICES
AND METHODS OF MAKING

ABSTRACT

[0057] An end cone for an exhaust emission control device is provided. The end cone comprises an outer shell and an end cone insulator. The outer shell has an inner surface. The end cone insulator comprises insulation and binder defining a passage therethrough. The end cone insulator has a first surface being disposed adjacent to the inner surface, and a second surface, at least a portion of which is exposed to the passage.
